SALE ORDER
Cattle will sell in catalog order

HERD HEALTH
All bulls have been fertility inspected by a licensed veterinarian.
All bulls have been BVD tested and are negative.
All bulls have been P.A.P. Tested
All bulls will have all health requirements needed to travel.

RETAINED INTEREST
Paint Rock Angus Ranch retains 1/3 revenue sharing interest in each bull selling. Buyer has 100% possession and 100% salvage value.

DELIVERY
Free delivery on bulls to adjoining states. Arrangements will be made on delivery for purchases less than 5 head to non-adjoining states.

DVAuction
Broadcasting Real-Time Auctions

GUARANTEE
All bulls will be covered 50% by Paint Rock Angus Ranch if they are injured during their first breeding season and unable to return to service during that first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. If a replacement bull is available, he will be provided. If a buyer prefers credit towards a bull in the following year's sale, 50% of the value of the injured bull, minus one-half salvage value will be given as credit. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2026.

TERMS AND CONDITIONS
This sale is being conducted under the suggested terms and conditions adopted by the American Angus Association, effective March 16, 1992.

Northern Livestock Bidding Instructions

For the Desktop:
1. It is best to use the Google Chrome web browser.
2. Pre-Register at least one day prior to the sale.
3. Go to bid.northernlivestockvideo.com and click "Get Approved to Bid".
4. Doing this will prompt you to create an account, after which you will fill out a bidder approval application.
5. Once Approved, an email will be sent to the email account provided, please click the link in that email to activate your account and a buyer number will be provided.
6. On sale day (after approval), visit www.northernlivestockvideo.com to view and bid!

For the Mobile:
1. Use your mobile device to download the Northern App and follow the above steps to get approved.
2. There is an instructional video on how to register to bid on our website, www.northernlivestockvideo.com if you have any questions.

For technical assistance with Internet Viewing and Bidding Questions, call Sam Fraser 406-860-0590.

Phone Bidding:
1. Anyone wanting to use the Northern Livestock phone bank to bid must pre-register and have a bid number to bid on the phone.
2. To register with NLVA call 866-616-5035 Before Sale Day.
3. View the Online CATALOG and VIDEO CLIP of each bull selling at www.northernlivestockvideo.com.
4. Bidders who are successful in making purchases will be contacted following the sale to make payment and delivery arrangements.

Northern Livestock's Sale Day Bid Line: 1-406-245-0889.

Welcome!

Things at Paint Rock Angus are changing and growing every day! Since our last bull sale, we've had some wonderful additions to the family. Our daughter, Emma, married Chance Karst, and they welcomed a beautiful baby girl, Lainey Lee! Chance and Emma will be staying on the ranch, working alongside the family to help run the operation. Our son, Asa, and his wife, Rachael, also welcomed a baby boy, Louis Shinn, in August making this their second child. Royce and Skye's three little ones keep growing and keep us on our toes! We are truly blessed by these new additions! Keeping family involved in this business isn't as easy as it once was, but we're grateful to see the next generation carrying it forward.

It's an exciting time in the cattle industry, with prices reaching record highs and herd numbers at historic lows. The demand for high-quality beef continues to grow, and it's encouraging to see a renewed appreciation for agriculture on the rise!

If you are unfamiliar with our program…We winter and calve our females at the ranch, but by May they head to the high elevations of the Big Horn Mountains, where they spend the spring and summer months. The bull calves are then weaned in September and moved here, where they're started on a high-roughage ration in large, rocky pens to prepare for the fall sale. These bulls are developed to be sound, muscular, and ready to go to work come spring.

In years past we have used some of the breeds most influential bulls, however this year we focused solely on using bulls that we raised. We feel that by re-incorporating our genetics back into our program we create more consistent progeny that our customers can count on. With that being said, the genetic merit behind these bulls will shine when their progeny is marketed, for a large group of calves that are similar in their phenotype and kind sell for premiums.

We don't talk enough about the females in our program. Our heifer pairs spend the summer on our highest elevation pasture, over 10,000 feet, where Mother Nature does the culling for us. Those that can't handle the conditions simply don't make it home. While it may not be the easiest or most conventional method, we believe this approach ensures that the females who remain in our herd are the toughest, most resilient producers–capable of raising bulls our customers can put their trust in. We have also been PAP testing longer than the PAP EPD has been around. We feel that this is a great way to find the outliers of the high-altitude problem that has been plaguing high desert/mountain herds for many years.

As always, our bulls will be wintered, semen tested and delivered in the spring at no charge. Thank you for your interest in our program, and we look forward to seeing you on November 25 th !

The Paint Rock Angus family!

Angus Reference Sires

We have used many influential sires over the years; bulls that have been extremely pivotal in the Angus breed and that many producers utilize. We have used many of our own sons out of our cows in the past, however, last year we decided to use them heavily and you will see that throughout this set. Many of these calves are solely out of bulls that we have raised and our set of bulls this year is just as deep as they have been before. We look forward to continuing to utilize our own sons to generate one heck of a bull battery to offer you.

The New Design sons that we have raised are not only extremely prolific but they have some of the highest libidos. These sons will cover the country and get the job done! The sons that we are offering are some of the longest built bulls in the sale with still offering so much body and width throughout. These bulls can go anyway you want them to.

Easy doing and easy feeding sums up the calves out of this sire. We have used this sire a lot the last few years and have been extremely happy with these cows and bulls. That is why you will see many calves out of bulls that we have raised from this sire. Deep sided, powerful, and good footed all while having the best dispositions. Some of the best cows in our herd come from this line!

SimAngus Bulls Sell In The Following Lots: 45 - 58 and 139 - 152

Quick Reference to ASA EPDs and $ Indexes

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and –5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-pounds more weaning weight than B. If calving ease were the trait, A would be expected to sire 15-percent more unassisted births in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and $ indexes visit www.simmental.org. Listed below are the units ASA EPDs are expressed in:

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)
Back Fat (BF): Inches of backfat.
Birth Weight (BW): Pounds of birth weight.
Calving Ease (CE): Percent of unassisted births when used on heifers.
Carcass Weight (CW): Pounds of carcass weight.
Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.
Milk (MLK): Pounds of weaning weight due to milk.
Marbling (MRB): Marbling score.
Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.
Ribeye Area (REA): Square inches of ribeye.
Warner-Bratzler Shear Force (WBSF): Pounds of force required to shear a steak.
Stayability (STAY): Percent of daughters remaining in the cowherd at 6 years of age.
Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)
Weaning Weight (WW): Pounds of weaning weight.
Yearling Weight (YW): Pounds of yearling weight.
Yield Grade (YG): Yield grade score.

AMERICAN SIMMENTAL ASSOCIATION "HYBRID" SIMANGUS EPD AVERAGES

CE	BW	WW	YW	MILK	API	TI
12.7	.10	76.90	119.4	23.6	135.98	81.89

$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where $ indexes come in. Through well conceived, rigorous mathematical computation, $ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following $ indexes: **All-Purpose Index (API):** Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.
Terminal Index (TI): Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.
Using API and TI: First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra $6,000 over a +50 bull if both are exposed to 30 cows over 4 years ($50 diff. x 30 hd. x 4 yr. = $6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and $ indexes visit www.simmental.org.

*** 3/8 Sim, 5/8 Angus**
Our Black Powder son that we raised and used heavily last year is one of the best SimAngus calves that we have had hit the ground. This sire got hurt and was out for his first breeding season. However, we kept him around knowing he was that good. This is our first set of calves out of this sire and as a whole we think they have the simmental power and match that with the Angus features of being stretchy and good footed cattle.

Lot 8 in August 2025

Our thoughts on the progeny of Reride 564-3:

There may not be as many sons out fo this sire as we were hoping. However, we bred to this bull heavily this year because we saw the great outcome from the few we had this year. This bull may be a cow bull but he stamps them with all the phenotypical advantages you need in your calf crop.

WINTERING AND DELIVERY:

As always you can expect bulls ready to perform when delivered in the spring! We pride ourselves on wintering these bulls on a high roughage ration in rocky pastures with appropriate bedding for the weather conditions. We know that a fat bull that has been laying on the frozen ground all winter won't be good for the customer or the producer so we take the extra time to make sure it's done right! In the spring we will deliver performing bulls straight to you and look forward to the visit!

Our thoughts on the progeny of the sons and grandsons of KG Double 07:

Easy doing and easy feeding sums up the descendants of this sire. We have used this sire a lot the last few years and have been extremely happy with these cows and bulls. That is why you will see many calves out of bulls we have raised from this sire. Deep sided, powerful, and good footed all while having the best dispositions. Some of the best cows in our herd come from this line!

Lot 26 demonstrates the traits that are typical of 007 progeny - sound footed, easy fleshing with a great disposition. Use these bulls to soften up your heifers and make easy feeding steers.

Lot 26

PAP Scores will be available at www.paintrockangus.com after November 5th.
We would also be happy to email or mail them to you!
Videos of the bulls will be available after November 8th!

Our family was blessed with two babies in 2025:

** Lainey Lee born to Chance and Emma*

** Louis Shinn born to Asa and Rachael*

Our thoughts on the progeny of Sitz Element 10088:

This bull is a calving-ease deluxe sire that consistently stamps his calves with a long, stylish, and balanced look – all while maintaining power throughout. If you're focused on building a fancy, dependable set of females, look no further. If you're looking to build a solid female group, this is the sire to look to. His female lineup each year are some of the prettiest and best built females around.

Our thoughts on the progeny of Paintrock Powder G212K:

Our Black Powder son that we raised and used heavily last year is one of the best SimAngus calves that we have had hit the ground. This sire got hurt and was out for his first breeding season. However, we kept him around knowing he was that good. This is our first set of calves out of this sire and as a whole we think they have the simmental power and match that with the Angus features of being stretchy and good footed cattle.

Our thoughts on the progeny out of New Design sons:

The New Design sons that we have raised are not only extremely prolific but they have some of the highest libidos. These sons will cover the country and get the job done! The sons that we are offering are some of the longest built bulls in the sale with still offering so much body and width throughout. These bulls can go anyway you want them to.

Our thoughts on the Motive progeny:

You will find this very influential sire in the pedigrees of a lot of our progeny. This bull and his sons have proven themselves time and time again.
They are true calving ease, with gainability and these bulls cover the country to breed a cow!

Lot 115

Lot 115 in August 2025

Our thoughts on the progeny out of AAR Really Windy 1205:

The Really Windy calves are a solid, consistent group – packed with growth, length, and stretch. Most importantly, they're easy doing cattle that combine real power with extra eye appeal. These bulls are extremely athletic and prolific, ready to cover plenty of country and get your cows bred.

"If you are unfamiliar with our program…We winter and calve our females at the ranch, but by May they head to the high elevations of the Big Horn Mountains, where they spend the spring and summer months. The bull calves are then weaned in September and moved here, where they're started on a high-roughage ration in large, rocky pens to prepare for the fall sale. These bulls are developed to be sound, muscular, and ready to go to work come spring.

In years past we have used some of the breeds most influential bulls, however this year we focused solely on using bulls that we raised. We feel that by re-incorporating our genetics back into our program we create more consistent progeny that our customers can count on. With that being said, the genetic merit behind these bulls will shine when their progeny is marketed, for a large group of calves that are similar in their phenotype and kind sell for premiums."

"Altitude Proven" means:

* Our cows have summered between 8,500 and 10,000 ft for over 70 years
* Accurate PAP scores
* Cattle that will be beneficial to high country producers and have performance in the feedlot
* Cattle with Structural Integrity bred into their bloodlines

Our thoughts on the progeny out of Mohnen Substantial 272:

These calves come very easy and put the pounds on. We utilized a son of this sire that we raised on a good majority of our heifers this year and it paid off.

Not a single calf from this sire was assisted.

These calves come small and grow into flashy heavy weight cattle that should be sought after.

Our thoughts on the progeny of Paintrock Powder G212K:

Our Black Powder son that we raised and used heavily last year is one of the best SimAngus calves that we have had hit the ground. This sire got hurt and was out for his first breeding season. However, we kept him around knowing he was that good. This is our first set of calves out of this sire and as a whole we think they have the simmental power and match that with the Angus features of being stretchy and good footed cattle.

Use Sim Angus bulls to add heterosis, power and performance with the same maternal traits of a traditional Angus female.

These bulls will put some serious pounds and uniformity into your steer calves while also making replacements that you will want to keep!

WINTERING AND DELIVERY:

As always you can expect bulls ready to perform when delivered in the spring!
We pride ourselves on wintering these bulls on a high roughage ration in rocky pastures with appropriate bedding for the weather conditions. We know that a fat bull that has been laying on the frozen ground all winter won't be good for the customer or the producer so we take the extra time to make sure it's done right! In the spring we will deliver performing bulls straight to you and look forward to the visit!

Don't discount this second group of Sim Angus bulls just because they are deeper in the catalog. They have the all the same potential that the first group did to add some hybrid vigor to your herd while maintaining the traits the Angus breed is known for.

" We don't talk enough about the females in our program. Our heifer pairs spend the summer on our highest elevation pasture, over 10,000 feet, where Mother Nature does the culling for us. Those that can't handle the conditions simply don't make it home. While it may not be the easiest or most conventional method, we believe this approach ensures that the females who remain in our herd are the toughest, most resilient producers–capable of raising bulls our customers can put their trust in. We have also been PAP testing longer than the PAP EPD has been around. We feel that this is a great way to find the outliers of the high-altitude problem that has been plaguing high desert/mountain herds for many years."

Our thoughts on the progeny out of New Design sons:

The New Design sons that we have raised are not only extremely prolific but they have some of the highest libidos. These sons will cover the country and get the job done! The sons that we are offering are some of the longest built bulls in the sale with still offering so much body and width throughout. These bulls can go anyway you want them to.
